

LOVE TEACHING CLASSES...

BUT TIRED OF ALL THE PAPERWORK?

ASM Instructor puts the class workflow in one place - from roster import and check-in through testing, skills, evaluation, class close, and final export. When the class is complete, ASM Instructor exports the final roster in the official Road Guardians required format.

FROM ROSTER TO FINAL RECORD

One class. One record.

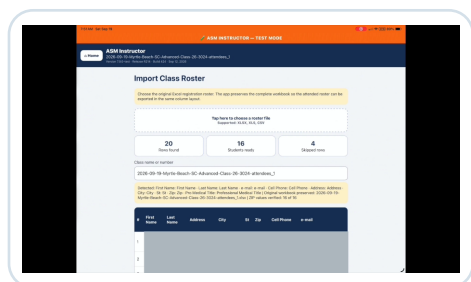

Roster, attendance, scores, skills, evaluations, photos, and final records stay together instead of living across separate sheets, files, and piles on your dining room table.

More time teaching. Never edit a spreadsheet again.

ASM Instructor handles the administrative work that follows you before, during, and after class. Keep your attention on your students while the app keeps the class organized, checks for missing information, and builds the final record as you go. **When the class is over, your paperwork is essentially over too.**

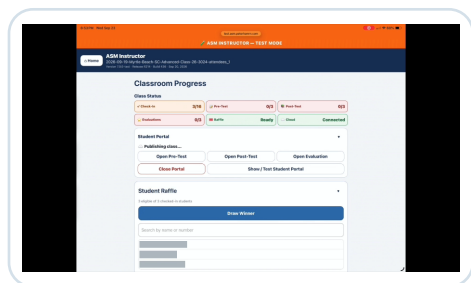

Your entire class. One app.

Practical tools for before, during, and after class. **ASM Instructor follows the same workflow you already use to teach an ASM class** - without forcing you to manage separate spreadsheets, forms, and records along the way.

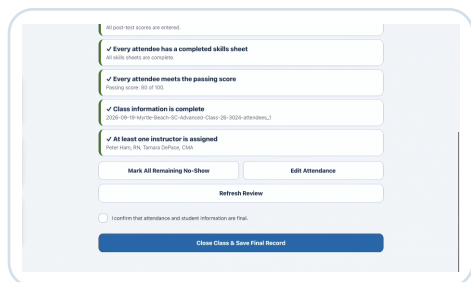

ROSTER & CHECK-IN

Import your registration roster and arrive with your class already organized. ASM Instructor identifies **missing or suspicious contact information and flags it** during check-in so you can correct it while the student is standing in front of you. Check students in, add walk-ins, and maintain an accurate roster without rewriting anything.

STUDENT PORTAL & CLASS PROGRESS PRO

Students use their own phones or other devices for pre-tests, post-tests, and evaluations. A static QR code in your PowerPoint opens the Student Portal, where students complete each activity on their own device. **Results flow back automatically.** The Live Class Monitor shows who has finished and who still needs attention. When evaluations are complete, ASM Instructor automatically collects and aggregates the responses - **no paper evaluations, counting checkboxes, or manually tallying results.**

ERROR CHECKING, CLOSE & FINAL RECORD

Before you close the class, ASM Instructor checks for missing scores, skills, evaluations, and other required information. Fix what needs attention, close the class, and produce the final record **without going back to manually edit a spreadsheet.**

WHAT ASM INSTRUCTOR HANDLES

- Roster import
- Check-in & walk-ins
- Manual test score entry
- Skills tracking
- Class error checking and close
- Student Portal PRO
- Live Class Monitor PRO
- Photo gallery PRO
- Automatic evaluation collection & aggregation PRO
- Expanded automation PRO

Free includes the complete core class-management workflow.

PRO

marks features included with ASM Instructor Pro.
